Declaration of consent (adults) for the project Pro_Met

I have been informed about the planned investigation for the project by Prof. Knoeferle (responsible supervisor and head of the research project). I have read and understood the subject information sheet for the above project. In addition, I have been verbally informed and informed extensively. I feel physically able to participate in an experiment. I have been warned that no medical diagnosis is performed.

My participation in the study is voluntary. There are no consequences/I do not suffer any disadvantages if I do not participate in the study. I can revoke my consent at any time until the anonymization of my data without giving reasons, without it having adverse consequences for me. In case of my cancellation my personal data will be deleted with immediate effect. Since my data is only stored under a randomised code, any revocation is only possible until I leave the lab. After that, the assignment of the data to my person is no longer possible. I realize that I can end/withdraw my consent for the study at any time. My data is only processed for the above studies and for no other purpose. A transfer of data to third parties will not take place. A publication of the results takes place only in anonymous form. Publications will be listed on the homepage of the group (http://amor.cms.hu-berlin.de/~knoeferp/Homepage__Psycholinguistics/Home.html). My data will be deleted after 10 years.

I have read the subject information sheet, I feel sufficiently informed and understand what it is about. I had enough time to decide whether I want to participate to the experiment or not and have received an electronic copy of the Consent Form, as well as of the Information Sheet.

I agree that

- ☒ *my data, as described in the subject information sheet, will be processed.*
- ☒ *the individual data records collected will be linked together*

and volunteer to participate in the desired investigation.

I hereby declare that I am over 18 years old. By clicking on "Continue" I declare myself ready to voluntarily participate in the experiment.
